About us

GE Water & Process Technologies is a forward-thinking and thoughtful leader in developing the water, water recycling and reuse, wastewater treatment and process solutions our customers need to operate more efficiently and profitably while minimizing their environmental footprint. Working with municipalities and companies in the mining, unconventional gas, oil sands, refining, power, food & beverage and pharmaceutical businesses, our goal is to help industries thrive and communities prosper. GE Analytical Instruments, a division of GE Water & Process Technologies, is a world-leading manufacturer of highly sensitive state-of-the-art instruments for simpler, faster, and more accurate analytical measurement.

Specialties

Water Recycling and Reuse, Integrated Water Solutions, Mobile Water Solutions, Waste to Value, Water Outsourcing, Water Treatment Chemicals, Water & Process Equipment and Chemicals, Membrane Elements, Cartridge Filters & Lab Products, and Analytical Instruments

Stilmas is an ISO 9001:2008 certified company, representing leading technology for water treatment, distillation, purification plants as well as ultra-pure steam production systems for pharmaceutical companies.

With more than 10,000 installations worldwide, Stilmas has played a major role in the Pharmaceutical / Biotech markets for over 60 years. Through distributors and agencies, Stilmas has a very strong presence worldwide, and the company has continued to increase that presence by opening offices directly in countries like China, Russia and the United States.

Stilmas manufactures state of the art equipment and turn-key systems in compliance with cGMP and International Pharmacopoeias.
